EDUCATION

American University of Sharjah (AUS)

B.S. in Computer Science | Expected Graduation:

May 2027

CGPA: 3.51/4.0 | **Dean's List Fall 2024** (GPA: 3.65)

Relevant Courses: Object Oriented Programming, Data Structures and Algorithms, Computer Networks

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, SQL, JavaScript, HTML, CSS, Assembly

Frameworks/Tools: Servlets, Git/Github, REST APIs, Linux, Bootstrap, MATLAB

Concepts: Data Structures & Algorithms, OOP, API Integration

PROJECTS

C++ Algorithmic Trading Backtester | Personal Project

Jan 2026

Technologies: C++, OOP, APIs, JSON

- Developed a C++ backtesting framework to evaluate systematic trading strategies on historical equity market data.
- Implemented order execution, transaction cost modeling, and portfolio level PnL accounting.
- Analysed strategy performance using risk-adjusted metrics including Sharpe ratio, CAGR, and profit factor across 10+ years of historical equity data.
- Designed modular OOP architecture enabling rapid addition of new strategies, indicators, and data sources.

Restaurant Ordering and Management System (Full Stack Web-App) | Academic Project

Dec 2025

Technologies: Java, Servlets, SQL, HTML, CSS, JavaScript, Bootstrap

- Developed a restaurant ordering platform supporting customers, chefs, and managers through role-based interfaces.
- Built dynamic menu management with image upload and real-time order creation.
- Implemented real-time order flow between customers and kitchen staff using servlet-based request handling and periodic client-side refresh.
- Designed analytics dashboards calculating revenue, wait-time statistics, and popular items across multiple timeframes, enabling data driven operational insights.

EXTRACURRICULARS

Formula Student Team – AUS (Vehicle Dynamics)

Nov-2024 – Jan-2025

- Collaborated in a high-pressure engineering team on vehicle performance analysis.
- Gained exposure to teamwork, testing, and problem-solving under competition timelines.
